EDUCATION

University of Toronto

Sep. 2024 – Present

Bachelor of Science in Computer Science (Specialist), Mathematics (Minor)

- CGPA: 3.77/4.0
- Relevant Coursework: Systems Programming, Software Design, Computer Organization, Theory of Computation, Data Structures and Algorithms, Probability and Statistics

EXPERIENCE

Office Volunteer

July 2025 – September 2025

Yee Hong for Geriatric Care

Toronto, ON

- Regularly maintained a database containing hundreds of stakeholder records, updating, creating and deleting entries to ensure up-to-date information
- Employed the MS Word mail merge feature to generate reusable letter templates with access to patient records to automate data entry, increasing efficiency and reducing errors
- Managed Excel Spreadsheets weekly to record and organize the work schedules of more than twenty employees

PROJECTS

Home Analyzer | *React, TypeScript, FastAPI, Python, YOLO, NumPy, OpenCV*

August 2026 – Present

- Engineered a tool that analyzes images of homes submitted by the user to detect and highlight furniture
- Developed a backend using FastAPI and Python that validates uploads and uses NumPy and OpenCV to transform image data from bytes into a matrix for YOLO
- Applied YOLO to analyze images and use the result to generates JSON containing the type of furniture and the coordinates of the bounding box for each furniture
- Designed a frontend using React and TypeScript to facilitate file uploads and render analyzed images with bounding boxes around each furniture

Shell | *C, Linux*

Jan 2026 – Apr 2026

- Engineered a Shell similar to Bash that supports the built-in functions echo, ls, cd, cat, wc, kill, ps and exit
- Implemented the ability for the Shell to create, store, and run any number of background processes in conjunction with piped processes
- Utilized the TCP Protocol and sockets to enable an arbitrary number of clients to join a server to participate in a messaging system in the Shell
- Tested and debugged using more than seventy test cases that tested various functionality and edge cases over the entire span of the project

Paint Canvas | *Java, JavaFX*

October 2025 – December 2025

- Collaborated in a team of four to develop an application that allows users to draw different shapes, apply various colours and edit using tools, such as cut, select and lasso
- Worked in a scrum environment, participating in four weekly meetings to discuss new user stories and bugs
- Handled five pull requests for teammates by testing their code, communicating issues and resolving merge conflicts

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C, Java, RISC-V, HTML, CSS, LaTeX

Frameworks and Libraries: React, Tailwind CSS, FastAPI, JavaFX

Developer Tools: Git, PyCharm, IntelliJ, CLion, VSCode, WSL, Tinkercad, Raspberry Pi, Arduino, MS Excel, Linux Terminal
